

MARUTI EQUIPMENT

MANUFACTURER OF

- HDPE Spiral Tank
- PP Spiral Tank
- Pickling Tank
- Acide Fume Extraction System
- Industrial Blower
- PP FRP Tank

We would like to take this opportunity to introduce ourselves as a part of "Maruti Equipment" group of Industries, The group is 14 years old with major interests in manufacturing a wide range of plastics product which is mostly useful in providing all chemical storage solutions & equipments.

Maruti Equipment is a professionally managed company with well structural departments responsible for proper planning & management in Research & Development, Manufacturing, Quality Assurance and Marketing.

All the products are developed at our advanced manufacturing units with the latest technology and quality components and materials sourced only from the reputed and authentic vendors of the industry.

The service and the complete product range of PPR-C/ PPR-FR composite pipes and fittings from 20mm to 160mm in 10, 16, and 20 kg/cm process under the brand Maruti Equipment. These products include HDPE Tank, Pollution Control Equipment, Pipeline Work, Lining Work, and Fabrication Work.

Most of the products manufactured by Maruti Equipment are customized and cover a wide range requirements of our clients. The products are acknowledged by the customers for their robust construction, fine finish, dimensional accuracy, and durability.

Our after sales team tyrelessly works hard to enhance the customer experience and work as a dedicated task force to meet the onsite challenges of different types of clients.

Being a customer-delight focused company, we prioritize the utmost energy towards ingenuousness, agility and immaculation by matching the highest level of satisfaction for our valuable clients. With the highest production capacity of our manufacturing, robust planning and nearly ready to dispatch stock, Maruti Equipment is able to fulfill the demand of bulk orders and turnkey projects.

**VISION:**

We have a vision of bonding customers with true solutions & helping Earth stay green with the higher quality products, which meets the international norms.

**MISSION:**

We strongly emphasis on Product Quality & Client satisfaction. We help to keep the environment clean. It is our mission – the basis of our existence – to successfully develop, produce and sell high-quality systems world-wide.

HDPE SPIRAL OPEN VESSEL

Maruti Equipment fabricates premium-grade HDPE Storage tanks using high-quality polyethylene. HDPE Storage tanks fabricated by Maruti Equipment are highly durable, light in weight, requires less maintenance, non-corrosive, and are suitable for use in bio-hazardous environment.

We are a substantial name among the industries for innovation and fineness that one can experience in our comprehensive range of the HDPE spiral tank, manufactured by our professional team of engineers leveraging years of experience and expertise. The HDPE material used in the construction of this HDPE spiral tank is absolutely environmentally friendly and hence is also accredited and endorsed by the government also for its same quality aspect.

To make you rest assured for the leakage issue occurred in the tanks, one of the leading heat fusion German welding technologies is used that ensures 100% leak-proof construction of the respective HDPE spiral tank. The offered range of the HDPE spiral tanks is in compliance with the ISO 9001:2008, BS and CE quality standards and flourishing in the market for featuring excellent corrosion resistance, chemical resistance, temperature resistance, high tensile strength, durability, lower life-cycle cost, light in weight, etc. We provide this HDPE tank in different specification ranging from 50 litres to 80000 litres capacity and also provide customized range of the same as detailed by the clientele.

We are offering a wide range of high quality PP spiral tanks. Fabricated using premium grade PP, these tanks are ideal for storing highly corrosive chemicals or pickling purposes. These tanks can be availed in cylindrical, vertical, horizontal and rectangular shapes. Further, our range of tanks are available in different capacities in compliance with prescribed industrial norms.

Maruti Equipment PP tanks are made from 100% co-polymer and homo-polymer polypropylene – a rugged, long-life material that will not delaminate, or brittle, even with exposure to aggressive chemicals, over long periods of time. We are one of the leading polypropylene tank suppliers in India and our PP tanks provide exceptional resistance to strong acids and alkalis even at higher temperatures.

BENEFITS OF USING SPIRAL PP TANKS ARE AS FOLLOWS.

- Immune to Corrosion
- High impact strength
- Easy to maintain
- Light weight
- Customized Product
- Long lasting
- Easy to Repair

PICKLING TANK

The HDPE chemical storage tanks that we manufacture are designed and developed using premium quality Polyethylene. HDPE pickling tanks, that find applications in various industries for pickling process or storing highly corrosive chemicals. Manufactured using high-quality raw materials, these tanks are appreciated for their robust construction, accurate dimension and long service life. Compliant with the set industrial standards, these tanks are available in different shapes and capacities to meet the diverse needs of the clients.

These storage tanks have gained wide appreciation for the following:

- Non-Corrosive
- Light Weight
- Durable
- Leak Proof
- Low Maintenance

PP FILTER NUTCH

PP TANK

ACID PROOF BRICK LINING

We are actively betrothed in offering an outstanding assortment of Forced Draft Blower Our offered blowers are designed by employing superior-quality components and cutting-edge technology by our Engineers & trained professionals. Our offered blowers are generally used in Ventilation / Boiler / dust collection that is suction of Air Dust Mixtures / Etc. Furthermore, these blowers are tested under the supervision of quality inspectors on predefined parameters to confirm a faultless range.

Features:

- Less power consumption Because of Designed by Highly Experienced Engineers.
- Highly efficient.
- Almost Noiseless & Vibration less.
- Seamless finish.
- High strength.

PP FRP TANK

Maruti Equipment PP FRP tanks are made from 100% polypropylene + FRP material. We are one of the leading polypropylene FRP tank suppliers in India and our PP FRP tanks are long lasting and durable for storage like Gas, acid, Water, Chemical Storage.

Features:

- Vertical Orientation
- High Temperature Resistant
- Horizontal Orientation
- Leg Support
- Level Indicator Equipped

**HDPE PIPE
FABRICATED BEND**

**FILTER PRESS WEIGHT
CAKE TRAY**

**CHEMICAL FILTER
PRESS PARNAL**

**FRP DRYER
TRAY**

FILTRATION PLATE

HDPE RECTANGULAR TANK

INDUSTRIAL STIRRER

HDPE SHEET VESSEL COVER FOR HINGE TYPE

PP FABRICATED TRAY

ACID PROOF BRICK LINING

HDPE FABRICATED BEND

OUR CLIENTS
